

# TM Group Shield: Intelligence-driven Compliance

## Compliance Archiving Powered by Arkivum 6

The rules for recordkeeping in the financial markets are changing. Global regulatory bodies have raised the bar for recordkeeping and governance standards and internal governance standards are rising to match. Compliance and IT teams alike need elegant, integrated solutions in order to meet the increased burden that MAR and MiFID II in particular will bring.

TM Group Shield powered by Arkivum 6 provides the end-to-end managed solution you need to archive compliance-sensitive records in a secure yet accessible manner.

		
<p><b>SAFETY: LIFETIME DATA SAFEGUARDING</b></p>	<p><b>MAKING ARCHIVED DATA USABLE</b></p>	<p><b>DATA SOVEREIGNTY</b></p>
<p>Highest standards of Data Protection</p>	<p>Data is accessible and exploitable for the long term</p>	<p>You control where your data is at all times</p>
		
<p><b>COMPLIANCE: PEACE OF MIND</b></p>	<p><b>SIMPLIFICATION: END-TO-END MANAGED SERVICE</b></p>	<p><b>INTEGRATION</b></p>
<p>Meet standards and mitigate / transfer risks</p>	<p>Managing the complete archiving lifecycle with a predictable TCO</p>	<p>Your archive solution is part of an ecosystem of connected services</p>

### Archiving Made Simple

Business-critical data is the foundation for many parts of a company's operations including finance, sales, marketing, and engineering. Ensuring that this data is protected for a long period of time and continues to be easily accessible is a key requirement for IT organizations.

TM Group has recognised its clients' demand for integrated compliance IT services. Now, together with its selected partners, TM Group offers an end-to-end records capture, retention, safeguarding and e-discovery solution: TM Group Shield.

### Sovereignty, Control and an Exit Plan

Arkivum will provide transparency and control over the sovereignty of your data and also provide the exit strategy you need to make sure your data remains under your control.

This is essential as part of a robust recovery policy yet often these basic rights are not embedded into other systems.

Arkivum believes that your data is yours, and yours alone.

With Arkivum 6, your exit route is built in, giving you peace of mind and total ownership of the destiny of your data.

Unlike others, we will never hold your data hostage through proprietary formatting or excessive data egress charges, and we make it easy to migrate your data to other suppliers.

### ISO 27001

Arkivum is ISO 27001 certified, meaning that you can benefit from our adherence to the highest quality standards and processes.

## Integrated Compliance & Governance

TM Group's Trading floor solution has always covered telephony and voice recording, compliance solutions and more – now we are able to provide a best-in-class layer of assurance over the long-term safeguarding of your organisation's digital assets

Our end-to-end, best-of-breed offering brings you the most complete solution with the industry's leading technologies. Fort/Guardian has you covered across the full lifecycle of every transaction and communication, enabling you to leverage a fully compliant platform that is also flexible and affordable.

### Pre-Integration Across All Layers

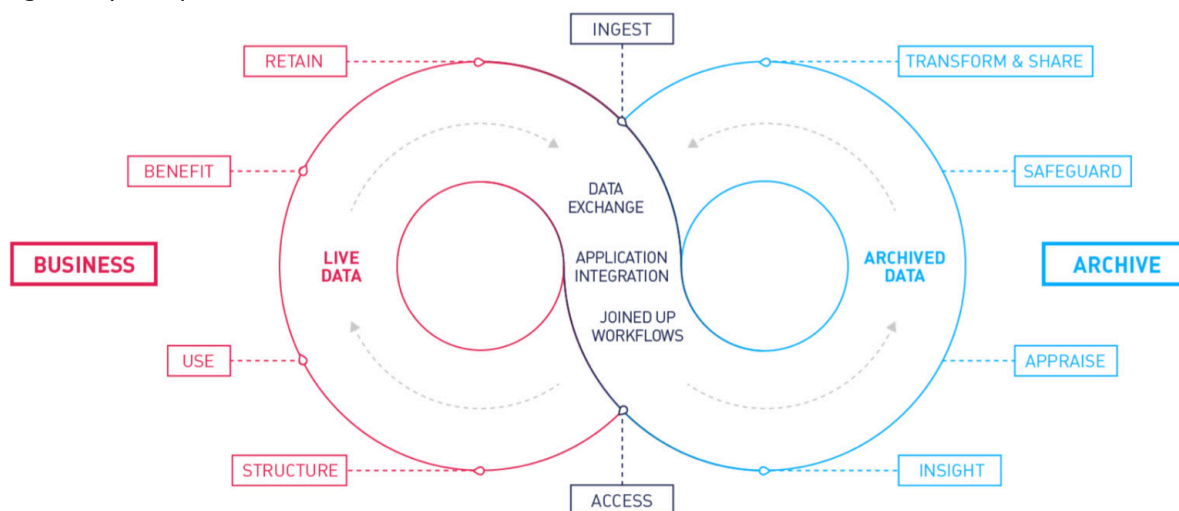

TM Group has developed comprehensive and innovative, built-in integrations of all the application layers. Thus, you can have an efficient and simplified delivery that is headache-free for IT.

### Flexible Deployment

TM Group supports the implementation approach that best suits your needs and requirements, enabling a cloud-based, on-premise, or a hybrid deployment.

### Extensive Domain Expertise

Furthermore, you will benefit from our extensive experience and proven domain expertise in global cross-regulatory compliance.

## End-to-End Managed Service

TM Group Shield powered by Arkivum makes sense for your long-term technology strategy:

- TM Group Shield is a comprehensive solution that addresses these governance requirements while being part of your overall long-term compliance IT plan.
- Thanks to its modular structure, it is designed to be as easy as possible to introduce into your technical planning while building for a more demanding future compliance regime.

## About Arkivum

Arkivum provides specialised best-of-breed long-term data safeguarding and archiving solutions, designed to respond to today's compliance and governance requirements. Arkivum works with institutions across multiple verticals, all of which generate high amounts of mission-critical data that needs to be preserved for many years to come.
